# MISSION STATEMENT

---

Erol Delos Santos is dedicated to creating a safe and welcoming space for people of diverse backgrounds and religions, providing a warm and connected environment for the community members and urban residents of New York City and internationally. His goal is to foster an inclusive atmosphere where humanity can thrive by living fully authentic spiritual lives.

# THE LOGO

## PRIMARY LOGO

The primary logo for the Erol Delos Santos brand should be used the most for branding purposes if the space permits. The logo is for business cards, website headers, signage, large prints, and various digital platforms.

The logo is a flaming chalice recreated in the form of stained glass. The skewed flame in the chalice communicates to the viewer although it's not in the center, it makes space for other ideas and concepts. It is a symbol of the Unitarian Universalist Tradition as well.

This brand showcases the warmth, the importance of community, and forming spiritual connections in the journey of urban ministry.

### Clearspace

To make sure the logo does not get crowded and ensure legibility, leave a consistent amount of clear space around the logo. The logo's safe zone is equivalent to the height of the 'E' on all sides.

SANTOS

### CLEARSPACE

# THE LOGO

---

## SECONDARY LOGO

The secondary logo is an alternative logo that uses elements from the primary logo in a different composition.

The logo can be for when the primary logo doesn't work in a chosen context. This logo is ideal for social media graphics, email signatures, or on a needed basis for smaller formats.

## WORDMARK, SUBMARK, & FAVICON

The wordmark is a text-only logo that brings focus to the brand name. It helps establish identification and recognizability. Wordmarks can be for labels, medium-large signage, on top of imagery, etc.

The submark features a smaller version of the flaming chalice and a few pieces of the stained glass background.

It is ideal in smaller condensed areas when the other logo variations don't work or fit. The submark can be for social media profile pics, stickers/stamps, small print pieces, etc.

The favicon is a smaller design that only includes a brand's initials or an illustration which is the upper part of the flaming chalice. It is mainly there to provide a branded final touch to your website. The favicon is for browser tabs, bookmarks drop-down, search bar, etc.

# COLOR PALETTE

## PRIMARY & ACCENT COLORS

The color palette is a mix of warm colors, browns, and yellows. Keeping a consistent palette helps with recognition from consumers. Primary colors are the main colors used to identify a brand and are found within the logo.

Accent Colors complement or contrast the primary colors. They create more emphasis in contrast with the primary colors. These colors are to be used sparingly.

### PRIMARY COLORS

HEX: #C18043  
RGB: 193, 128, 67  
CMYK: 0, 42, 74, 26

# BRAND IMAGERY

## PHOTOGRAPHY

Keep in tune with a kind, communicative, and inviting feeling for the brand. Imagery that shows genuine interactions between others and their surroundings, especially in diverse communities, is ideal.

Pick imagery with warm tones to help establish a connection with the viewer.
